

SERVICE OVERVIEW

Endpoint Detection & Response

Your endpoints are multiplying – see and secure them all, anywhere with NuSecure.

Gain full visibility to your fixed and mobile endpoints with 24x7 endpoint detection and response (EDR).

Your business is growing, and so is your list of third-party vendors, cloud services, IoT and connected devices. Every new endpoint introduces a new layer of cyber risk. Simplify endpoint security - do more than simply view and block device access. Let us continuously manage your business' endpoints 24x7 with endpoint detection and response (EDR), Nuspire's SIEM technology and always-on managed detection and response (MDR).

Stop covert endpoint threats in their tracks with cross-platform visibility.

Enjoy direct integration with Nuspire's award-winning SIEM technology

Expedite security event triaging and time to resolution with AI-drive threat detection

Rest easy with advanced threat containment and remediation

Access custom reports, as you need them

From simplistic single-agent deployment to full spectrum endpoint protection and malware control, Nuspire's EDR capabilities provide comprehensive security for every CPU that accesses your network.

nuSecure's EDR service leverages award-winning technology that provides Nuspire's SOC analysts with highly enriched intelligence to support the identification of known and unknown security events. Response and remediation leverage machine isolation and malicious traffic blocking. All endpoint service security events are integrated into Nuspire's SIEM and correlates with other client security services to provide maximum visibility and immediate response to malicious events, 24x7.
