

SERVICE OVERVIEW

Managed Gateway Security

Guard your gateway.

Threat prevention starts at the perimeter.

Managing day-to-day technology, troubleshooting and custom configurations is time consuming, especially with limited resources and a lean IT team. Simplify gateway monitoring and management with managed gateway service (MGS) from Nuspire. This fully managed 24x7 service handles perimeter security on your behalf leveraging the latest unified threat management (UTM) technologies, provided as a component of the nuSecure platform.

- Gain full visibility of gateway device events with 24x7 security monitoring and management
- Correlate gateway device security events with other network and endpoint assets
- Augment your current team with 24x7 security experts for event remediation
- Simplify reporting that aides audit and compliance requirements

Nuspire gateway-as-a-service combines UTM hardware with monitoring and response with comprehensive management of the full UTM toolset, protecting your environment 24x7x365. **Whether you've got an established security program or are just getting started, we've got you covered:**
